

DIVAR AN 3000 & 5000

960H Analogue Recorders

www.boschsecurity.com.au

BOSCH
Invented for life

- ▶ 960H RT high resolution on HDMI output
- ▶ Mobile device support (iOS, Android)
- ▶ Network function for remote viewing, playback, control and alarm notification
- ▶ Simultaneous monitoring, recording and playback
- ▶ Keyboard and e-SATA connections, plus video loop-through (DIVAR AN 5000 only)

The DIVAR AN 3000 and 5000 are a family of 4/8/16 channel digital recorders that use the latest 960H high resolution video technology and state-of-the-art compression techniques. The recorders are available with a number of storage capacities and a built-in DVD burner can be specified. The DIVAR records multiple video and audio signals while simultaneously providing live multi-screen viewing and playback. Comprehensive search and playback functions provide quick recall and viewing of recorded video.

Key Features

▶ Recording

The DIVAR is very easy to use. Simply connect the cameras, apply power and let the unit record automatically with no further intervention required. The DIVAR can record at up to 25 (PAL) / 30 (NTSC) images per second, per channel at 960H resolution.

▶ Dome control

PTZ devices, including the AUTODOME range from Bosch and a number of third party domes, are supported.

▶ Storage management

Alarm functions include local inputs and relay outputs, plus motion detection in user-defined areas. If an alarm is detected, the DIVAR can send an e-mail notification to anywhere, display an on-screen message and sound a buzzer and/or show a warning.

▶ Remote access

Using the PC software or built-in web application via a network, you can view live images, playback, and perform configuration. Also, a DIVAR Viewer App from Bosch for iOS and Android devices is available for live viewing and PTZ control. This means you can watch live video from cameras connected to the DVR from anywhere in the world. You can also control focus, pan, tilt and zoom on PTZ enabled cameras.

▶ Export recorded footage

If required by authorities, exporting of recorded footage can be easily done through an intuitive interface directly to USB flash storage or to the optional onboard DVD writer.

Typical Applications

- ▶ Home / Domestic use
- ▶ Small to medium sized offices
- ▶ Restaurants
- ▶ Retail stores
- ▶ Service stations
- ▶ Licensed premises
